

Stand-Up Pouch from Roll-Stock
Zipper Option

SUP Horizontal Packaging Machines were designed for the secure storage of grains, solids, powders, liquids, and pastes in 3-side seal sachets or stand-up pouches. Providing perfect seals in modern packages, meeting the market's need for a solution to improve point-of-sale displays while also adding value to the final product.

SUP Equipment is widely flexible because it allows the application of several accessories on the packages, adding convenience to the product use; as well as, helping to preserve the ingredient's properties, providing quality and meeting consumer's requirements.

SUP makes it possible to get great results without detriment to those looking for a low operating cost for their product line.

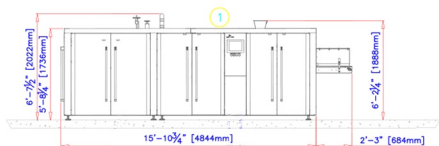

Fully Enclosed Robust Structure

Protection around mechanical products, complying with international safety standards, and ease of equipment cleaning and maintenance.
